FREE SAMPLE

This is 26 pages. The full catalogue is 960.

You have just read **Section 04, Engine electrics** — the whole section, 12 diagrams and 641 numbered parts: alternator brackets, pulleys and V-belts, the ignition coil and HT leads, glow plugs and current rail, the steering lock and ignition/starter switch, and the starter stripped to its individual parts. Every diagram is followed by its own parts list, and the same fitment is drawn again for each year and engine it changed on. The Mk1 Jetta Master Parts Catalogue is 960 pages of exactly that: every VW factory parts diagram for the Mk1 Jetta, 1979–1984, deduplicated and organised by VW group code. Each diagram carries its engine codes and year range, so you can tell whether a part fits your car before you order it.
