FREE SAMPLE

This is 24 pages. The full catalogue is 1,066.

You have just read **Section 04, Engine electrics** — the whole section, 11 diagrams and 397 numbered parts: the alternator with its brackets, pulley and V-belt, the ignition coil and HT leads with their spark plug connectors, the TCI switch unit, both 1981 distributors down to vacuum unit and condenser, the ignition/starter switch and steering lock, and the starter broken out into its single parts. Every diagram is followed by its own parts list, and the same fitment is redrawn per year and per engine — 1977–78, 1979–80, 1981, carburettor and K-Jetronic, 1.1/1.3 and 1.7 — so you work from your own car's layout. The Mk1 Scirocco Master Parts Catalogue is 1,066 pages of exactly that: every VW factory parts diagram for the Typ 53 Scirocco, 1974–1981, deduplicated and organised by VW group code. Each diagram carries its engine and year applicability, so you can tell whether a part fits your car before you order it.
